Education

KVG college of engineering

Oct 2023

Bachelor of Engineering in Computer Science (GPA: 7.00 / 10.00)

Sullia, Karnataka

- **Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming concepts(OOP's), Web Technology and Applications, Database Management System, Operating System, Software Engineering

Experience

J-spiders

Sep 2023 – Apr 2024

Full Stack Development Intern

Bangalore, Karnataka

- Designed and implemented responsive user interfaces using front-end technologies(HTML,CSS,JavaScript).
- Developed server-side functionalities using frameworks such as Node.js to handle data processing and server-side logic.
- Troubleshoot and resolve back-end application issues, including performance, stability and security issues.
- Utilized relational database Oracle to store and retrieve data efficiently.

Technologies Global Private Limited

Aug 2022 – Sep 2022

Internship Trainee

Bangalore, Karnataka

- Designed and implemented responsive user interfaces using Python and ML and developed projects using hand gestures.
- Introduced automated testing processes with IOT to maintain data processing.
- Troubleshoot and resolve back-end application issues, including performance, stability and security issues.
- Provided technical support to internal customer including diagnosis and fixing problems, answering questions and providing documentation.

Projects

Labour Hiring | Angular, Java, Spring Boot, Hibernate, MySQL

- Built front-end with Angular, ensuring smooth and intuitive and user friendly experience. Integrated StyleSheet for smooth and centralized management.
- Implemented the back-end using Java, Spring Boot and utilized Hibernate for database operation.
- Implemented database functionality using MySQL for efficient data storage and retrieval in application.

Real Estate Management System | HTML, CSS, JavaScript, PHP

- Developed front-end using HTML,CSS and JavaScript for interactive and user friendly interface.
- Integrated PHP for secure user authentication with efficient data storage .
- Developed server-side functionality with the help of PHP in order to access the given gesture smoothly to the client .

Multiple Human Disease Detection | Python, Django, HTML, CSS, Bootstrap

- Built front-end with HTML, CSS, and Bootstrap ensuring smooth and intuitive and user friendly experience Integrated StyleSheet for smooth and centralized management.
- Developed server-side functionality with the help of Python in order to access the given gesture smoothly to the clients.
- Implemented database functionality using MySQL for efficient data storage and retrieval in application.

Food Supply System | React.js, Tailwind CSS, Node.js, MongoDB

- Developed front-end with React.js and Tailwind CSS ensuring smooth user experience integrated redux for centralized state management.
- Integrated MongoDB for secure user authentication with efficient data storage.
- Developed server-side functionality with the help of Node.js in order to access the given gesture smoothly to the clients.

Technical Skills

Database: Java, C++, Python, JavaScript, TypeScript, PHP, HTML, CSS

Languages: MySQL, MongoDB

Technologies: React.js, Django, Spring Boot, jQuery, Bootstrap, Angular, ASP.NET, Node.js, Android SDK

Concepts: Operating System, Computer Network API, Data Structure and Algorithm, Software Development Lifecycle, Git, Database Normalization
